# 1 Origin

## ALIENS... THEY CAME BACK TO MAKE A SECOND EXPERIMENT, THE BIGGEST THREAT TO HUMANITY

A million years ago, they created humans, implanting a new gene into primates to improve them.

But the race they created was not powerful enough for their plans, and their disappointment gave way to anger, seeing what humans had done to the world.

Another experiment was needed to replace this one, using a strong creature, sacred and revered by people since time immemorial: pandas.

Thousands of pandas were kidnapped and genetically modified.

But the experiment did not go as planned...

Too powerful, evolving too fast, with a problematic taste for blood, the pandas were rushed back to Earth.

This new superior race formed the most dangerous coalition ever seen.

The future of humanity and the world is now very uncertain..

**Welcome to the clan!**

# 2 Dual Token Economic System

- Meta Panda has a dual-token economic system of **MPS + Bamboo**.

## MPS

It's the Meta Panda governance tokens, MPS token holders can participate in community governance and voting rights on major game decisions.

Some key operations of the game require consuming MPS tokens, such as minting a Panda, buying equipment or pandas on the marketplace, fighting in dungeons and opening a chest or level up your panda

**Listing price: \$0.05**

## Bamboo

This is the main currency in the game. Bamboo is required in most consumption scenarios in the game. For example, heroes need to consume Bamboo to upgrade; Bamboo is required for expenses when challenging dungeons and upgrading your equipment.

You can also use Bamboo to hire a new panda to form a team together, etc. Bamboo can be obtained by mining by participating in daily work. Bamboo will also be traded through the DEX platform.

**Listing price: \$0.0066**

# 3 PvM Arena

Meta pandas are warriors and love blood. Your metapanda can fight against humans, aliens, monsters in dungeons... The dungeons are different depending on your level, as you gain levels, the dungeons evolve, with new creatures and bosses to fight, and more MPS to earn.

When you win a dungeon, you get MPS tokens and a chest that contains equipment.

To advance to the next level, you must first pass the dungeons, then use the MPS.

# 4 Bamboo Mining

To avoid the deflection and dump of the MPS the Bamboo token has been created as a second token for mining and reward for dungeons.

When the panda is not on adventures, the panda can do some job to gain bamboo. You only need to click the button, and it will start to work and gain bamboo. Based on the level, yield will differ. The higher the requirements, the higher the wages of bamboo that can be gained.

# 5

# Level

For initial mint after the release of the game and the **public sale** Pandas will start **level 1**.

For those who did the **first presale**, pandas will start **level 3** and for the **second presale** pandas will start **level 2**.

You can **level up** your panda by consuming a certain amount of Bamboo and MPS, the higher the level the more Bamboo and MPS you need to consume.

Leveling up your panda is important if you want to increase the panda's combat power and mining speed.

	MPS	Bamboo Token	Failure probability	Yield multiplier
<b>Level 1 to Level 2</b>	600	9,000	0%	2
<b>Level 2 to Level 3</b>	1,000	15,000	0%	3
<b>Level 3 to Level 4</b>	2,500	37,500	2%	6
<b>Level 4 to Level 5</b>	5,000	75,000	3%	12
<b>Level 5 to Level 6</b>	14,000	210,000	5%	20
<b>Level 6 to Level 7</b>	24,000	360,000	10%	30
<b>Level 7 to Level 8</b>	52,000	780,000	15%	50
<b>Level 8 to Level 9</b>	100,000	1,500,000	25%	75
<b>Level 9 to Level 10</b>	300,000	4,500,000	35%	120

After level 3 the upgrade can fail, if it fails the Panda's NFT will disappear.

# 6 Mint

You can hire your panda through the hero hiring page. 60 000 MPS Tokens (300\$) will be needed for each panda. Each panda will get random attributes in the form of NFT tokens, and you can freely transfer/give/sell the heroes.

**Each address can hire 6 Pandas per day.**

# 7 Attributes

## Wisdom

Wisdom represents the wiseness of the panda.

It's calculated on the addition of the clothes and hats attributes. In case your panda has an aura, it gives a bonus.

$$\text{Wisdom} = 30 + \text{clothes} + \text{hats} + \text{aura}$$

For example if you wear a Furcoat and a green cap it give you :  $30 + 35 + 6 = 71$ .

It gives 71 of wisdom so 71% of the mining rate.

**1000 token per day = 710 tokens**

# 8 Market-Place

Need to find a specific weapon or piece of equipment?

At the Marketplace, you can trade your Pandas and equipment.

It's a great place to get the best deals and find what you need, but also to sell what you want.

# 9 Chests

(Equipment, MPS, Solana, Gems)

You can buy chests or earn them by fighting in the dungeons.

4 types of chests available:

- Common (contain some bamboo)
- Rare (contain MPS, basic equipment)
- Epic (contain MPS, epic and equipment)
- Legendary (contain MPS, legendary equipment and SOL)

# 10

# Cash Reserve

**The cash reserve will be composed of a liquidity pool divide in two different modes:**

- The first mode will lock the MPS for a given period and will provide you a yield (APY)
- The second mode will be like the first mode without the lock, you can unstake your MPS when you want.

# 11

# Equipment

**Panda equipment gives advantages for dungeons. 4 levels of rarity exist:**

- Common
- Rare
- Epic
- Legendary (also increase the bamboo mining)

### Weapon :

Sword, knife, Lasersaber, hammer, ice punch, fire punch, axe

### Armor :

Bullet proof vest, armor, etc..

### Pets :

Dragon, Serpent, Tiger, etc..

# 12 Events

Every month a PvP event will take place to win a huge prize in a special dungeon. The event will take the form of a tournament, with the top 5 winners sharing the prize.
